## Mexicans Start Local Revolution

A small sized Mexican revolution broke out in Wrangell last Tuesday evening when the Mexicans of the town got mixed up with a little to much liquor and started things moving in the Mexican barbor shop and pool room. A couple of pool balls were put in play, one of them going through the window, and a knife was in evidence, but the rest of them kept out of the way and it was not used on anyone. Marshal Wallace made a cleanup of the place and arrested four Mexicans and a native, Geo. Shakes. They were tried before Commissioner Thomas Wednesday morning, and a charge of assault and battery charged against the Mexicans and disorderly conduct against Geo. Shakes. One of the Mexicans was sentenced for three months, one for two months and the other two for twenty days each, and Geo. Shakes was fined \$40.00, which he was unable to pay and will spend twenty days with Mr. Wallace.

Reindeer meat at Nome is selling this winter as low as 15 cents a pound.

The land telegraph line between Kaltag and St. Michael has been abandoned.

Cordova has started in to clean out the undesirable citizens.

## Who Is The Next Council

Who will run for the next Town Council? seems to be a question that is not worrying the citizens of Wrangell very much up to the present time. The present council goes out next month and a new one takes office, the election being held the first Tuesday in April. Several of the present councilmen will probably run again and others have signified their intentions of staying out, and to who will and will not it is impossible to say as yet. But if you haven't registered you had better attend to it at once the books are open at Chas. Follensbee's Barber Shop. Ladies don't forget to call around and register, remember you have a say in the affairs of the city so if you want to vote register now.

## Machine Shop Gets Agency

The Wrangell Machine Shop have added another good line to their business by getting the Wrangell agency for the Fairbanks Morse line of engines and accessories. This is one of the best known engines in the world and many of them are found in use here, so if you are looking for a good reliable marine or stationary engine you had better see them.

## Humboldt Brings Alki Passengers

The Alaska flier Humboldt arrived up on her first trip of the season last Tuesday evening. She had a good passenger list this trip, having the passengers of the Al-Ki, which blew out the cylinder head on her high pressure engine the day after leaving Seattle, and after much work it was repaired and she started limping back to Seattle when she met the Humboldt to whom the passengers and mail were transferred. The Al-Ki will probably be off the run for three weeks or a month.

## Let Contract For Fine Boat

By a contract let yesterday, Mr. F. Matheson will soon be the owner of the finest run-about speed cruiser in Southeastern Alaska. The new boat will be 36 feet long and will be powered with a 36 to 50 horse power Lowe-Victor, 6 cylinder, high speed engine. The new boat will have a speed of from 15 to 20 miles per hour, and will be very complete in every detail, having electric lighting system, and the automobile control from the pilot house. The contract was awarded to Wm. Fletcher and calls for delivery the middle of April.

## Wins Every Game of Season

The Wrangell Basket Ball Team played their last game of the season last Saturday night and, as is customary with the team, won over their opponents, the Petersburg team, to the score of 51 to 8.

The visiting team arrived over from Petersburg about two-thirty Saturday afternoon, three boat loads coming, bringing the band with them, which played some excellent music as the boats came into port. The game was played at the Rink to a very full house.

Along with the Petersburg team came the ladies team of that city and they played a game with the Wrangell ladies before the boys game. The ladies game turned out to be the feature of the evening, both teams doing some fast playing although they fell short on the basket shooting and the game turned out a tie to score of four to four, although it looked for a while as though the Wrangell ladies were going to loose, but they came up strong at the finish and evened the score. After a discussion between the ladies of the two teams they decided to let the score stand and play it off at some future date.

After the games the big hall was cleared and everyone enjoyed themselves with dancing and showing the visitors a good time. The basket ball teams served lunch in the hall at midnight, and everything turned out to make it a very enjoyable evening. Manager Purinton of the Rink expressed the thanks of the Wrangell people to the visitors for their good attendance and invited them to many more to come. Mr. Robert Olsen replied for the visitors, stating that they had a very pleasant trip and would look forward to many more.

This is probably the last game of the season for the local team as it seems impossible to get a game with either the Douglas or Juneau teams and the boys are quitting with a percentage of 1000 having won every game they have played, and would have won as many more if it had been possible to play them. Wrangell certainly has the team and the boys are quitting with all the glory obtainable.

## A.P.A. Superintendent Boosting Fair

Mr. L. Schott and family are taking in the sights of the fair at San Francisco and along with the other Californians are boosting it. On the last mail the Editor received a copy of the San Francisco Chronicle of February 21, from Manager Schott, which contains a picture section relating to the fair. The paper is very interesting and shows some of the wonderful architecture and beauty of the exposition.

Alaska's population is said to have increased 3,000 last year. A still greater increase is expected in 1915.

## Big Crew At Tokeen

According to a Seattle report, 250 men are to be employed this summer at the quarries of the Vermont Marble Company. Most of the men will be employed at Tokeen and the remainder at Red Bay, on Prince of Wales Island, about 35 miles from Wrangell. According to advices given out at the offices of the company the output this year will be increased to 600,000 cubic feet annually. This Alaska marble is being recognized as some of the finest in the world, the only superior being the highest grade of Italian marble, and is finding a ready market all over the United States and a great amount has been used at the San Francisco exposition. The company will have a new boat in operation soon to co-operate with the Vermont of the Company.

## Local Talent At Photoshow Saturday

A one act burlesque will be presented by Billy Woodworth and Company at the Photoshow Saturday night. "Subject for Dissection" is the name of the playlet and Billy says it is a real laugh producer by far the funniest of the little comedies he has given Wrangell in the past. There is a good cast and all parts are well handled.

## Fire Boys Hold Meeting

The regular monthly meeting of the Wrangell Fire Department was held last Monday evening at the City Hall. A large bunch of the fire boys were present. The meeting was called to order by President Grant. After the regular routine of business the report of the dance committee was read which shows that the boys did some good work along that line and had two dollars to the good which was turned over to the department and will go towards the accident fund. A vote of thanks was tendered the committee and all others who helped to make the dance a success. After a discussion the department decided to attend the Rink Theater in a body Tuesday evening and attend the show as an item of their appreciation for the donation of the Rink for the dance and the help given the department by that management and others of the Rink.

## Printing Point Does Not Bob Up and Down

In an L. C. Smith & Bros. Typewriter the point on the paper which is to receive the type impression is stationary at the instant the type hits. The carriage does not bob up and down when the shift is made to write capitals.

Why?

Because the *type* is shifted—not the *carriage*.

The only movement of the carriage is back and forth on its closely adjusted ball bearing runways—and this does not take place while the print is being made. There is no lifting of the carriage.

This is one reason why L. C. Smith & Bros. type-writing is free from blur and every letter in the right place.

## Ketchikan Editor Gets In Bad

The article which appeared in last week's issue of the Progressive, purporting to be the story of the trouble between Father Duncan, of the Metlakatla settlement fame, and the natives, has added fuel to the controversy. In view of the fact that Mr. Duncan's side of the trouble has been broadly advertised, the editor referred to in the article being desirous that the natives' side be told, made the statement as published, to which Mr. Duncan took exception, with the result that the editor of the Progressive was arrested, taken before the U. S. commissioner, the charge read, which was followed by a long explanation by Mr. Duncan from the beginning of his relation with the tribe up to this day, and the editor was discharged.—Ketchikan Progressive.

A pippin of a show at the Rink tonight.

# WEST COAST NEWS

F. E. BUTLER, EDITOR : Craig, Alaska

We have been asked to define a "knocker" but are not sure that there are sufficient words, with which we are familiar, in our language that would to our satisfaction describe or express our extreme contempt for such a creature. But, in part, we would say that it is a being in the form of man, sometimes women, not often, with eyes that look upon all men, women and things crosswise, slanting and blurred, with a mind warped, twisted and diseased, propelled and directed by something slightly resembling intellectuality, who is not satisfied with himself, his condition, surroundings, existence, source or cause of existence, one not fit to dwell with or among men, not even a befitting associate for jackals, vermin, snakes or the devil—To hell with'm.

We understand that a certain business man (?) of a neighboring town is one of a party now in Washington lobbying with congress and the heads of certain departments of the government for the removal of the bonding privileges to shippers through Canadian territory and the placing of an export tax or something of that sort, on fish caught in American waters. Knowing the individual we are not surprised that he would be influenced (properly approached) by the Seattle gang (birds of a feather etc.) to aid them in their nefarious plot to retain their present shell game control against the interests of the Alaska fisherman and business men. The gentleman referred to has some business interests on the West Coast but by this act shows clearly that he has no interest in the welfare and prosperity of the community in general but is a Judas in the business world.

Since writing the article published in a recent issue of this paper in reference to the money deposited with the Territorial treasurer by the forest officials, we have made further investigation of the matter and find that the act of congress directs that the money turned over to the local authorities shall be used in the counties where the same was derived from the sale of timber, etc., and shall be used in said counties for the construction of trails and the maintenance

of public schools in such counties. While in Alaska we have no counties established, we have the Territory divided into judicial and legislative divisions, which it would seem answers the purpose as to where the money should be spent, thus carrying out the spirit and intent of the law. Therefore, as practically all of the money now in the treasurer's hands was derived from the sale of timber etc. in the First Division, our members of the legislature from this division should take special interest in the matter.

A petition sent out by the Ketchikan Chamber of Commerce requesting signatures, was received a few days ago, praying the proper government officials for the construction of a wagon road or trail across the island from Hollis to this place, also for the construction of a telephone line from Hadley via Kasan, Karta Bay and Hollis to this point. It is needless to say that it was unanimously signed here and everybody seems ready and willing to push the scheme in any other way that should become necessary to obtain this much needed improvement. Any one who is familiar with the country at either of the terminuses of this proposed road and telephone line, will tell you that the scheme is not only possible but practicable, and would be an improvement that would certainly open up and make accessible a new and, to the belief of all of us who have prospected to a limited extent in that vicinity, exceedingly rich mining district, thus adding greatly to the development of the country. The upper end of Kasan Bay, Karta Bay, Hollis and the West Coast will, if the proposed trail and telephone line is assured, experience a rapid development of their natural resources and a permanent growth of population that will be surprising to the most rabid optimist. We are glad to note that the Ketchikan Chamber of Commerce is at last showing a disposition to take up matters that will help the whole country and not the town of Ketchikan alone. That which helps one, helps all. Keep it up gentlemen; we, on the West Coast of the island will give you all the aid possible, for we are pledged to the development of the whole country.

## Queer Bet On European War

Even residents of Alaska show some interest in the European war. Out at Cordova a Greek and a Scandinavian made a bet on the outcome of the Warsaw campaign, by the terms of which the loser is to walk down to the end of the dock and jump in the sea.

## A Queer African Plant.

In South Africa there is found a plant of the genus mesembryanthemum growing on stony ground which so closely resembles a pebble that it is invariably taken by the stranger to be a stone. Another species of the same plant growing on the hills round the Karoo produces two leaves about as large as ducks' eggs, having a surface resembling weathered stone of brownish gray color. These plants look like stones, but for a short time they put forth bright yellow flowers. Still another species of the same plant resembles the quartz pebbles among which it grows.
